Summary

Objective

Detail-oriented and innovative professional with over 20 years of management experience and a recent focus on software and web development. Proven track record of learning and adapting to new technologies, demonstrated through successful project completions on GitHub and ongoing software development education. Seeking to leverage programming skills and a customer-centric approach in a web developer or software development role.

Education

• Software Developer Course, Joy of Coding (Expected Completion 2024)
• Google's Data Analysis Certification, 2023

Experience

Freelance Web Developer & Software Programmer
2023 – Present

• Developed and managed multiple projects, including a full-stack website using HTML, CSS, JavaScript, Python, and Django, showcasing a strong foundation in both front-end and back-end development.
• Actively contributed to open-source projects and maintained a diverse portfolio of work on GitHub, emphasizing proficiency in Python and web technologies.
• Demonstrated ability to manage version control and maintain an organized database of projects, paralleling skills in audio file management with technical development processes.

Management Experience (Grocery, Food Service, Freelance Operations)
2003 – Present

• Leveraged over 20 years of management experience across various sectors to excel in project management, customer service, and business operations.
• Excelled in data visualization and spreadsheet management, applying analytical skills to drive business decisions and operational efficiencies.

Music Producer
2016 – Present

• Collaborated with international artists, managing and organizing a diverse range of audio files, which honed skills in data management and version control akin to software development practices.
